

Narval™ CC
Mandibular repositioning device (MRD)

Narval product packaging update

First impressions count, and that is why our new packaging was designed to indicate to patients that Narval CC is an innovative, custom-made device enabling them to take the first step toward a better night's sleep.

From its stylish new storage case to a conveniently-sized denture brush to a handy inner sleeve that organizes patient instructions and other included items, the new Narval packaging is sure to help deliver a positive experience for your patients.

Narval™ CC
Mandibular repositioning device (MRD)

Contents included with each Narval prescription

- Narval CC mandibular repositioning device
- Portable storage case for use at home or on-the-go (features a handy compartment for individual connecting rods)
- Denture brush for cleaning the device
- Narval connecting rod kit
- Instructions for use
- Warranty information
- Convenient patient take-home box with handle

Update to cleaning instructions & tools

We have removed the sonic cleaner/agitator and replaced it with a denture brush. Our internal tests show that the most accurate cleaning comes from brushing Narval CC every day and using an antibacterial denture cleanser twice a week.

Other packaging updates

- Connecting rod kits are now provided in a color-printed, heat-sealed foil package.
- The warranty card has been reformatted to fit the inner sleeve.
- The instructions for use (IFU) has been reformatted and updated to reflect the new packaging and cleaning protocol.

New shipping box

All contents included with each case will be contained in the white patient take-home box, which will, in turn, be shipped inside a designated brown shipping box. Outer dimensions for the shipping box are as follows:

11 inches (length) x 10.6 inches (width) x 5 inches (height)
